

# ceramic sinks

**A timeless classic.** With all of the simple, elegant quality of a bygone era, yet equally at home in the most contemporary of settings – it's no wonder ceramic sinks are enjoying such a huge renaissance.

# farmhouse sinks

With generous proportions and strong character, farmhouse style sinks are for those who want a modern interpretation of the way sinks used to be.

## A touch of class

Classic and elegant, this Victorian sink style is characterised by a striking front face which sits proudly on show. It looks superb in a traditional setting, but is equally at home as a design piece within a contemporary kitchen. Made lovingly by hand using traditional methods and materials, our ceramic sinks are fired in intense heat to ensure a non-porous, scratch, heat and chemical resistant finish.

For the majority of farmhouse sinks, the tap is mounted neatly into the worktop itself, which gives you the freedom to choose larger, more sculptural tap designs. As they are fitted beneath the worktop, these sinks can be used with granite, solid surface or wooden worktops.

### Epsom farmhouse sink

This sink fits the full depth of a conventional sized worktop, with the tap fitted into the sink. Both practical and stylish, this one and a half bowl variation of the farmhouse sink is designed to make an impact.

*Note: Each sink is hand finished, so no two sinks are ever alike – sizes may vary by plus-or-minus 2%. Therefore, we recommend that you measure the actual sink before fitting.*

## Ceramic drainer option

Subtle and sweet, this square ceramic drainer has been specifically designed to complement farmhouse style sinks. It sits neatly on top of the worktop next to your sink and when not in use, can be simply stored away.

# inset sinks

Inset ceramic sinks with their elegant lip and smooth lines, blend subtly into the worktop surface. Smart, sophisticated and extremely robust, this very versatile style of sink will look great in any kitchen.

If you have your heart set on a ceramic sink, but don't want to limit your worktop options – an inset style is the answer. From traditional shapes with beautifully crafted drainer patterns, to sleek, linear models, they come in an array of designs to suit any decor. Inset sinks feature a smooth lip that sits on top of the worktop, providing a neat and tidy finish.

The tap is then mounted on top of the sink itself. It is this fitting method which makes these sinks so versatile, allowing you to combine them with an array of worktops including granite, wooden or solid surface. It is also the best choice for those who prefer laminate worktops.

### Designer draining

Most inset sinks feature a built-in drainer. Although drainers have a functional purpose, the design of the drainer pattern can have a dramatic impact on the overall look of the sink. If you're after a flat, modern drainer, our Avalon sinks will fit the bill, or if you prefer something softer, try our romantic Winchester range.

*Note: Each sink is hand finished, so no two sinks are ever alike – sizes may vary by plus-or-minus 2%. Therefore, we recommend that you measure the actual sink before fitting.*

individual bowls

The elegant beauty of ceramic, combined with the freedom to create your own unique style is what makes this range of individual bowls such an attractive choice.

Practical and hard-wearing, our individual ceramic bowls are manufactured to the highest standards, ensuring that each sink is non-porous, scratch, heat and chemical proof. Our beautifully proportioned bowl depths are also ideal for accommodating a host of essential daily tasks.

Individual bowls provide complete design flexibility, enabling you to select the size, shape and number of bowls to suit

your specific needs. Another benefit of this sink style is that the tap is set into the worktop, allowing you to experiment with some of our larger, more prominent tap designs.

For a classic look, try our traditional round bowl or for something that exudes contemporary chic, combine a single sink with a stainless steel tap.

#### Versatile bowls

Both the Berkshire and Hampshire bowls are extremely versatile. They can be inset with the lip positioned above the worktop, or undermounted to fit beneath it. These sinks can be also used in combination or individually, depending on the space available – so let your creativity flow!

*Note: Each sink is hand finished, so no two sinks are ever alike – sizes may vary by plus-or-minus 2%. Therefore, we recommend that you measure the actual sink before fitting.*
