

modern taps

Stunning, distinctive and stylish, Caple have an extensive range of taps to complement the modern kitchen. Design-led and sculpturally inspired – every one is a showstopper.

The once humble tap is now fashioned into an array of contemporary shapes and sizes that are graceful and aesthetic. Caple's modern collection is meticulously designed and uncompromising in quality – each tap is utterly practical and built to last. Our range also includes innovative ideas, such as progressive valve technology that simplifies control and creates ergonomic taps with sleek, smooth lines and shapely contours.

Just remember, taps add the finishing touch to your sink design, so think big and don't be afraid to make an impact! Professional spray taps look brilliant with a set of undermounted individual bowls, whilst the thin ribbon curve of our Delta tap in polished chrome is simply divine when teamed with any modern styled sink.

Stunning stainless steel

A contemporary alternative to the popular polished and brushed chrome options, is luxurious stainless steel. Incredibly attractive and durable, our stainless steel taps will add a truly professional touch to your kitchen – look out for the logo.
